***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-7, 9-12, 14-18 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Rem et al (US 5,555,642) new cited. Rem discloses a process for upgrading low-quality wood comprising the steps of: a) subjecting the substrate to radio frequency (RF) energy in a constrained environment having a pressure above atmospheric for a time sufficient to heat at least part of the moisture contained in the substrate to a temperature of or above the boiling point of water at ambient pressure; (col. 4, lines 5-36); and b) reducing pressure in the constrained environment in a manner causing the moisture within the substrate to boil or evaporate (col. 4, lines 48-49 and col. 6, lines 4-9).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rem et al (US 5,555,642) new cited, in view of Neogi et al (US 20040258941). Rem

Art Unit: 3742

discloses substantially all features of the claimed invention except the lignocellulosic substrate is concurrently or subsequently impregnated with a composition. Neogi discloses a lignocellulosic substrate is concurrently or subsequently impregnated with a composition (par. 0008). It would have been obvious to one ordinary skill in the art at the time the invention was made to utilize in Rem a lignocellulosic substrate is concurrently or subsequently impregnated with a composition as taught by Neogi in order to treat the object to have a greater decay resistant.

***Response to Amendment***

5. Applicant's arguments with respect to claims 1-3, 5-7, 9-12 and 14-23 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T. Van whose telephone number is 571-272-4789. The examiner can normally be reached on 8:00Am 5:00Pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tu Hoang can be reached on 571-272-4780. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
